

2nd Grade Summer 2010

Contact Mrs. Solomon

Dear Parents of Soon-to-be Third Graders;

Our year has come to an end. Thank you for entrusting your children to me for the last 10 months. We have made so many good memories, especially receiving the Sacraments of Reconciliation and Eucharist. I have seen tremendous mental, spiritual, and physical growth in all of your children this year. Best wishes to all as they graduate to the big playground next year!

Throughout the year, I have been talking to your children about the concept of "use it or lose it", and how important it is to exercise their brains. Please have your students practice the following this summer:

- addition and subtraction facts,
- multiplication flashcards for zeros, ones, twos, fives, and tens,
- math and reading/language arts enrichment packets

Have them do a little schoolwork every day. It will give them a heads up when they start Third grade. The Third grade curriculum is much more challenging and moves at a much faster pace than Second grade. They need to be prepared to succeed! Look at the Third Grade web page for the Summer Reading Assignment and Supply List.

Dear Parents of Incoming Second Graders;

I am looking forward to getting to know your children. Second grade moves at a faster pace than First Grade. There are steps that you can take this summer to ensure that your child is ready to hit the ground running when Second grade begins.

- Practice addition and subtraction facts
- Practice printing. The alphabet and practice writing paper is on the Second grade class web page.
- Come to Second grade knowing how to tie shoes.
- Read, read, and read some more!
- Summer book reports are due Monday, August 30th.
- Enjoy your summer!

God's blessings always,
Mrs. Solomon
